### *Monthly Jobs Report*

#### **Revised March and April Preliminary Jobs Figures Released**

INDIANAPOLIS (May 15, 2006) – The number of jobs in Indiana has risen for three consecutive months and is now 18,500 higher than this time last year, according to figures released today by the Indiana Department of Workforce Development.

Indiana's seasonally adjusted job figures indicate a revised March total of 2,969,400 jobs while preliminary figures for April indicate 2,972,000 jobs. The April seasonally-adjusted employment total represents an increase of 2,600 jobs from March.

The payroll employment statistics used in the jobs report is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers.

#### **Seasonally Adjusted Figures**

The nation's seasonally adjusted figures for April show that U.S. employment gained 138,000 jobs during the month and 2 million over the year. The monthly gain was attributed to continued strength in health services, financial activities and mining. Growth in construction slowed and there was a decline in trade workers.

Meanwhile, Indiana remains approximately 41,900 jobs off its peak, which was reached in May of 2000. The number of jobs in Indiana according to March revised data was 2,969,400, whereas April preliminary figures were 2,972,000.

In the seasonally adjusted employment levels, construction posted the largest gain in April, increasing by 2,400 jobs. The construction gain was partially offset by losses in other services and government. Compared to the same time last year, Hoosier payrolls have increased by 18,500 jobs, with most occurring in service-providing industries.

#### **Non-Seasonally Adjusted Figures**

Indiana's April preliminary non-seasonally adjusted payroll estimates indicate 2,980,200 jobs for the state, while March's revised total reported 2,954,200 jobs. Employment growth was slightly less than the most recent trend. Professional and business services and leisure and hospitality produced fewer jobs than were expected.

#### **Non-Seasonally Adjusted Metropolitan Statistical Areas**

Preliminary job figures in the state's Metropolitan Statistical Areas (MSA) for March, with last month's and last year's job numbers:

<b>MSA</b>	<b>Apr 06</b>	<b>Mar 06</b>	<b>Apr 05</b>
Anderson	45,100	44,700	45,200
Bloomington	82,500	82,000	83,200
Columbus	43,100	43,000	43,000
Elkhart-Goshen	129,800	129,200	129,700
Evansville	180,300	178,600	179,300
Fort Wayne	216,600	214,600	213,200
Gary	280,000	277,100	278,500
Indianapolis	891,100	883,600	886,800
Kokomo	47,200	46,900	48,200
Lafayette	94,500	93,800	93,500
Michigan City	47,900	47,300	47,200
Muncie	53,200	52,700	54,000
South Bend	147,800	147,200	145,600
Terre Haute	74,600	74,400	74,700

The Department of Workforce Development is charged with continually improving the Hoosier workforce by assisting companies to create new jobs and improve employee skills. The agency offers a variety of training and educational grants, partners with Indiana's 26 WorkOne Centers, administers the unemployment insurance system, provides labor market information, assists employers with preparing workers for layoffs and closures and operates a statewide job placement service.

**Technical Notes:**

- Payroll employment is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers.
- The survey that calculates the payroll employment estimate is conducted by the U.S. Bureau of Labor Statistics and is conducted during the week of the 12<sup>th</sup> of the month.
- In calculating employment figures, two different types of calculations are provided. The first, *non-seasonally adjusted*, provides information without taking into account the effects of seasonal trends. In calculating the *seasonally adjusted* information, employment that follows more or less a regular pattern each year, including holiday or summer employment is factored out of the estimate. The adjustments make it easier to observe the cyclical and other non-seasonal movements.
- For the most accurate analysis, please use revised data sets and not preliminary estimates.

-30-

*Note to media: There have been inquiries regarding the difference between jobs and employment releases provided by the Department of Workforce Development. The following definitions outline the differences between these two statistical measurements.*

*Jobs (release date: May 15, 2006)*

*Job statistics are provided by the U.S. Bureau of Labor Statistics, derived from a survey of payroll records. As a payroll survey, it is based on an individual's place of work and includes industrial classifications. It includes non-farm wage and salary reports, but does not include self-employed, business owners and farm workers.*

*Employment (release date: April 25, 2006)*

*Employment statistics are provided by the U.S. Bureau of Labor Statistics, derived from a household survey. As a household survey, it distinguishes whether an individual (counted once) is employed or unemployed, even if that individual has more than one job. The unemployment rate is calculated from these same statistics.*
